Tickerlines — *Ga W ee , S ca e*

It creates technical opportunities and solutions for traders and analysts of financial markets. The Wheel of 24 is made up of several different components; each one can be fully customized and has a specific purpose to allow access to all required information.

(Under Development)

Creating Customizable SVG in Reactjs

The Wild West — *D ƒ d Sa , Te Se e*

Centralized platform that allows users to speculate on the price movement of cryptocurrency pairs like BTC/USD within a short timeframe (typically 5 minutes)

Led a cross-functional team in improving customer satisfaction, resulting in a 50% increase in positive feedback and a 20% reduction in complaints

AWS lambda, AWS Cognito, dynamoDB are the main requirements.

- Backend handled in nodejs using serverless framework
- dynamoDB used for data store
- AWS Cognito for user authentication

Abid NFT Marketplace — *Web e, La d Web e*

Decentralized NFT marketplace like OpenSea where users can mint land and sell it on platform or can give on rent.

Web3/Ethers.js, Solidity, Metamask connectivity used for blockchain transactions

The Tasty Plate — *Web e*

A meal preparation platform where user can buy meals based on nutritionally balanced and delivered directly to door each week.

Executed new social media strategies.

Fans Room — *Web e*

Adult platform designed to connect content creators and fans in a personalized way. Similar to platforms like OnlyFans. Creators can share content, including photos, videos, and live streams.

I worked on frontend. Agora implemented for Video and Voice calling.

HLC — *H e ca c d*

HLC is the multi solution marketplace where clients can start business

with pre-built platforms like e-commerce, food delivery etc.

My role is to work on an admin panel which has multiple roles like Admin, Sub Admin and Vendor with fully customized options for websites. In this project I learned how e-commerce and food delivery services work.

Educify — *Web   e*

Educify is a global Educational Technology company focused on making education accessible to everyone in every subject possible and in all manner of ways; be it online, in-person, or as a course that is accessible anywhere in the world.

I worked on both backend and frontend independently. Implemented The Lesson Space for Virtual classes.
